

COLORADO BIRD OBSERVATORY

April 8, 1993

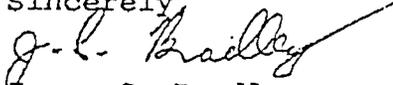

Bruce Thatcher
US DOE
FAX 966-2256

Dear Mr. Thatcher:

On April 2, 1993 the Colorado Bird Observatory sent a letter stating that Bald Eagles had not been observed in the Standley Lake area since March 22. This letter is an update of the April 2 letter.

Local residents and the U.S. Fish and Wildlife Service contacted me today (April 8) to report sightings in the area on April 5, 7 and 8. Apparently, Bald Eagles are still using the Standley Lake area.

Sincerely,

James S. Bradley
Research Assistant
