RE: Standley Lake Diversion Canal - Protection Project - Soil
Samples

Dear Dave:

Late Friday afternoon, June 5, I was made aware of your letter to Ray Printz and your request to enter property acquired with Open Space funds to do soil samples for the referenced project. You indicated in your letter that the property includes both the Rocky Flats Remedial Action property and the Standley Lake park property. You also indicated that work is scheduled to begin on June 8.

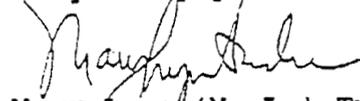

Today I will prepare a letter to David Simonson and Bob Birk at the Department of Energy and Mike Guillaume at EG & G notifying them of your request and asking for a response since Rocky Flats Remedial Action property is involved in your request. Ron Hellbusch and Richard Dahl are aware that we recently received a request from Mike Guillaume, EG & G Rocky Flats, for access onto the same County owned property for sampling. On April 9, 1992, I gave Ron a copy of the Use Agreement that Department of Energy provided to us. The Board of County Commissioners approved this agreement on April 20 and we are awaiting a fully executed copy of the Agreement. Are the Department of Energy and EG & G aware of your proposed sampling?

Before the County can decide what type of approval we might consider granting, I will need to hear from the Department of Energy and EG & G since EG & G assumed Rockwell's unsatisfied obligation under the Settlement Agreement of December 14, 1984 regarding the Rocky Flats Remedial Action Property, that such approval is acceptable.
