

Mr. Terry Vaeth, Manager
October 1, 1992
Page 2

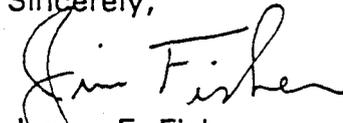

These are people we can count who actively used these facilities. We know that a significantly larger number of people enjoy the facility through "windshield use," i.e., they take joy and comfort in the views and with the knowledge this is public green open space for all to enjoy. Many of your employees live within the North Jeffco District and utilize our existing facilities and programs. With expanded facilities near the plant, your employees would be able to conveniently participate in a variety of recreational activities. If, with your help, we are jointly able to accelerate this process, the public, as well as our agencies will be the beneficiaries.

Your positive response to our request can build a partnership with DOE, the district, and the local community that will result in reclaiming land that is currently thought to be unusable.

The community needs additional golf and sport facilities. DOE would gain a positive image in the community and with your help and cooperation, we will both find ourselves in a win win situation by providing recreational facilities that improve the environment and the quality of life for your employees and our residents.

I would be pleased to discuss this in more detail at your convenience.

Sincerely,

James F. Fisher
Executive Director
