Re: Transmittal of Pond 207A Visual Survey Report

Dear Randy:

Enclosed are six copies of the Draft Final Pond 207A Visual Survey Report for EG&G and DOE review. The draft final version incorporates results from the pond reinspection on February 26, 1993. The pond was reinspected in February due to the presence of ice and snow in the northeastern portion of the pond during the December inspection. The location of boreholes in Pond 207A were revised slightly based on results of this visual survey.

Please call me if you have any questions.

Sincerely,

RUST ENVIRONMENT & INFRASTRUCTURE

Barbara J. Neary, PE
