REPLY TO
ATTN OF: ERD:SRS:06507

SUBJECT: Final Technical Memorandum 4 for the Phase I RFI/RI Work Plan for Operable Unit-4

TO: Autar Rampertaap, Chief, Rocky Flats Branch, EM-453, DOE-HQ

Please find the Attached copies of Final Technical Memorandum 4 (TM 4) to Final Phase I RFI/RI Work Plan for the Operable Unit 4, Solar Evaporation Ponds project. Technical Memorandum No. 4 presents the proposed exposure scenarios in support of the Baseline Risk Assessment (BRA) for the RFI/RI Report. TM 4 was previously reviewed by HQ, HAZWRAP and the regulators, comments were provided and are addressed within the revised final document. Please review this final document with respect to the comments received from CDH/EPA and the HAZWRAP/ORNL responses to the regulator comments. We want to make sure that we have adequately addressed all comments, but have not given away any technically valid positions which may have been disputed by the regulators.

Please expedite your review of the TM and forward comments by FAX (303-966-4871) or via teleconference with Scott R. Surovchak of my staff on June 8, 1993.
