Mr. Joe Schieffelin, Unit Leader  
Hazardous Waste Facilities  
Colorado Department of Public Health and Environment  
4300 Cherry Creek Drive South  
Denver, Colorado 80222-1530

Gentlemen:

As agreed in the Joint Working Group meeting on February 1, 1995, the Department of Energy (DOE) is making a record of the joint decision to not obtain core samples from the soils beneath Pond 207B South. As discussed with your staff, current data from the other 207B ponds and Pond 207A has provided characterization data necessary for the closure option present in the Proposed Interim Measure/Interim Remedial Action-Environmental Assessment Decision Document for Phase I remediation of the Solar Evaporation Ponds (Operable Unit No. 4). The DOE will secure core samples of soils directly beneath Pond 207C to complete characterization of those soils as agreed on August 2, 1994.

If you have any questions, please feel free to contact Briand Wu at 966-5899.

Sincerely,

  
Steven W. Slaten  
IAG Project Coordinator
