Amendment to OU 4 IM/IRA Decision Document

Robert Benedetti, Associate General Manager  
Environmental Restoration Management  
EG&G Rocky Flats, Inc

My letter dated February 17, 1993, (attached) to the Colorado Department of Health and the Environmental Protection Agency, Region VIII concurred with the DOE January 25, 1993, request to amend the OU 4 IM/IRA Decision Document. Several actions are required to document this change to the Decision Document.

- 1) A copy of the January 25, 1993, DOE letter and the attached February 17, 1993, CDH/EPA response letter need to be inserted into each official copy of the IM/IRA Decision Document. This is especially important for copies at the Public Reading Rooms.
- 2) Provide notice of this change in summary form for the Environmental Restoration monthly newsletter.

Please take action to complete these key documentation steps. Contact Frazer Lockhart at extension 7846 or Scott Surovchak at extension 3551 if you have additional questions.

Richard J. Schassburger  
Acting Director  
Environmental Restoration Division

- 7) Modify language on pages 3-6, 3-8 and 3-9 (or elsewhere) of the IM/IRA DD to clarify that B910 distillate may, as stated on page 3-1, " be reused as makeup water in the raw water system or condensate systems on plant site " Sampling and analysis of the distillate, as set forth in the DD, shall remain the same whether the water is sent to the raw water system or condensate systems (This amended item is in response to a latent verbal request for modification )

In Mr Hartman's letter of January 25, reference is made to a revised IM/IRA Milestone Schedule (Table 3 2) (We assume that Attachment 1 of the letter is intended as a replacement for Table 3 2 ) However, as stated in our letter of February 16, 1993, we will not approve a revised schedule to supersede the original schedule included in the IM/IRA DD (Table 3 2) We reserve our rights to assess stipulated penalties dating from the original milestone dates

Lastly, we acknowledge the commitment that the Radio Frequency portion of the Telemetry System for surge tank leak detection will be operational before water is transferred to the tanks Should this fail to occur, DOE is not permitted to transfer water from the ITS to the tanks without further approval from the Division and EPA

A copy of your letter of January 25, 1993, and this letter, must be inserted into each official copy of the IM/IRA DD upon receipt A final decision on the State permit modification incorporating the DD, and these amendments, will be issued in the near future

While we do not believe that these changes to the IM/IRA DD are significant enough to warrant the issuance of an Explanation of Significant Differences (ESD), DOE should inform the public of these changes in the next monthly newsletter

If you have any questions please contact Harlen Ainscough of the Division at 692-3337 or Arturo Duran of EPA at 294-1080

Sincerely,

Gary W Baughman, Chief  
Facilities Section  
Hazardous Waste Control Program  
Colorado Department of Health
