Based on the information you provided, this office has determined that your work within Colorado can be authorized by the Department of the Army Nationwide Permit found at 33 CFR Part 330 Appendix A, (B) (26). Enclosed is a fact sheet which fully describes this Nationwide Permit and lists the General and Section 404 only conditions which must be adhered to for this authorization to remain valid.

Although an Individual Department of the Army permit will not be required for the project, this does not eliminate the requirement that you obtain any other applicable federal, state or local permits as required. Please note that deviations from the original plans and specifications of your project could require additional authorization from this office.

This proposed activity will not jeopardize the continued existence of the Spiranthes diluvialis (Ute ladies' tresses orchid) or destroy or adversely modify habitats occupied by this threatened species.

You are advised that this verification of the nationwide permit authorization is valid until February 17, 1995.

The surface water monitoring station installations 001, 002, 003, 029, 107 and 127 will require authorization by EPA's Waste Management Division through the authority of CERCLA.

If you have any questions concerning this determination, please feel free to contact Mr. Terry McKee of my staff at (303) 979-4120 and reference Nationwide Permit action ID 199380095 Jefferson County.

Sincerely,

Timothy J. Carey
