Re: Routine Data Submittals

Dear Mr. Lockhart:

EPA has been working with members of your staff and EG&G during the past few months in developing EPA and DOE compatible databases of chemical, geologic and hydrologic information obtained from environmental monitoring and restoration studies undertaken at the Rocky Flats Plant. DOE and EG&G have submitted chemical data for operable units 1, 2 and 7 and borehole and water-level data for wells constructed during 1986 to 1989 in electronic format for incorporation into EPA's database. It is EPA's understanding that submittal, in electronic format of chemical data for the remaining operable units and the hydrologic and geologic data for boreholes drilled in 1990 is pending completion of validation and verification procedures. EPA requests that this data be submitted as soon as your staff completes their QA/QC review. Additionally, a schedule indicating completion of validation and verification dates is also necessary.

In order to keep the EPA database current with ongoing sampling, EPA is requesting bimonthly submittals in electronic format, of newly generated verified and validated data. A specific format for future data submittals was discussed previously with Mr. Steve Singer of EG&G.

ADMIN RECORD

A-DU07-000029

EPA would like to set a schedule for regular submittals and requests a response on this issue before February 15, 1991. Please contact Patricia Corbetta at (303) 294-1135 to follow up on these matters.

Sincerely,

Martin Hestmark, Team Leader
Federal Facilities Remedial Branch
