RE: DRAFT FINAL, OU 7 TECHNICAL MEMORANDUM NO. 3, SURFACE SOIL AND ASBESTOS DISPOSAL AREA CHARACTERIZATION PLAN, January, 1993

Dear Mr. Schassburger,

The Colorado Department of Health, Hazardous Materials and Waste Management Division (the Division) and the U. S. Environmental Protection Agency (EPA) have reviewed the document referenced above. Our review has determined that this document adequately describes the proposed characterization plan with the exception of the comment mentioned below.

Section 3.2, which describes asbestos disposal characterization, is too general. We would prefer that the various geophysical methods listed in this section be evaluated prior to their inclusion in this proposed characterization plan. Once evaluated, we will be able to approve the selected method(s). This section also does not provide enough detail about how asbestos-bearing materials will be sampled and how all the accumulated data will be used to characterize the asbestos pits.

This document is conditionally approved pending satisfactory resolution of these comments on Section 3.2. Once approved, this technical memorandum will be an addendum to the Final, Phase I RFI/RI Work Plan for OU 7.
