FEB 28 1992

92-DOE-1986

Mr. Pat Rogers  
Colorado Geological Survey  
1313 Sherman, Room 715  
Denver, Colorado 80203

Dear Mr. Rogers:

The U.S. Department of Energy (DOE) is hereby transmitting one copy of the revised "Final Phase I RFI/RI Work Plan, Original Process Waste Line (Operable Unit 9), Rocky Flats Plant", dated February 1992. Note that there are two volumes. This document is a requirement of the Interagency Agreement between DOE, the Colorado Department of Health and Environmental Protection Agency.

We are providing this document in an effort to seek coordination and cooperation with the Natural Resource Trustees as required by CERCLA Section 104 (b) (2). This document, with the exception of the environmental evaluation work plan, is a final work plan and as discussed at the Natural Resource Trustee meeting held on November 13, 1991, will not be modified per your comments. However, DOE will consider your comments and additions will be made to the work as appropriate.

As a result of the RFP Risk Assessment Technical Working Group meeting held on February 21, 1992, we will be transmitting a revised environmental evaluation (EE) work plan for review and comment by trustees responsible for biological resources. We will transmit the revised EE work plan by March 27, 1992.

If there are any questions or concerns regarding the enclosed document, please contact Bruce Thatcher of my staff at 966-3532.

Sincerely,

David P. Simonson  
Assistant Manager  
for Environmental Management

*Recd. Mr. P. Rogers  
3-2-92*
