We concur with your proposal (89-RF-4074, attached) to core through the existing 750 and 904 Pads for the purpose of installing temporary shelters necessary for the accelerated pondcrete disposal effort. Please ensure procedures are in place to ensure the material exhumed is properly containerized, labelled, and secured on each pad.

Please contact me, or have your staff contact Mark E. Van Der Puy, of my staff, on extension 2473 if you have further questions.
