RESPONSE TO COMMENTS SUBMITTED BY THE REGULATORY AGENCIES ON THE OPERABLE UNIT (OU) 13 DRAFT COMPENDIUM OF IN-SITU RADIOLOGICAL METHODS AND APPLICATIONS AT ROCKY FLATS PLANT - NMH-492-93

EG&G Rocky Flats, Inc. (EG&G Rocky Flats) and the Department of Energy, Rocky Flats Office (DOE, RFO) received comments from the Colorado Department of Health (CDH) and the Environmental Protection Agency (EPA) on the Draft Compendium of In-situ Radiological Methods and Applications. The Draft Compendium was submitted to the regulatory agencies on April 2, 1993 as a condition for approval of the Final Phase I RCRA [Resource Conservation and Recovery Act] Facilities Investigation/Remedial Investigation (RFI/RI) Work Plan for Operable Unit (OU) 13. EG&G Rocky Flats personnel have reviewed the comments and found them to be inconsistent and outside of the scope originally envisioned for this project.

When the draft was being prepared, EG&G Rocky Flats sought to have a meeting with the regulatory agencies to properly scope the contents of this paper. Since the regulatory agencies were unable to attend, a brief outline was submitted.

The written comments on the draft document indicated that a more comprehensive document was preferred. This change of direction may be a result of individual comments from the Technical Review Group members who also reviewed this document. This would also explain why there are some contradicting comments.

A meeting has been scheduled for September 28, 1993 to clarify the objectives of this document and to eliminate confusion regarding the conflicting comments. EG&G Rocky Flats technical representatives, DOE, RFO project managers, and representatives from EPA and CDH will be present at this meeting. Once the scope is established, a schedule and budget will be developed.

EG&G Rocky Flats will keep you informed of progress on this issue. At present, there is not a task covering this activity in any work package, and no source of funding has been identified.
