RE: FINAL, PHASE I RFI/RI WORK PLAN, INSIDE BUILDING CLOSURES
(OPERABLE UNIT 15), U. S. DEPARTMENT OF ENERGY, OCTOBER 1992

Dear Mr. Lockhart,

The Colorado Department of Health, Hazardous Materials and Waste Management Division (the Division) and the U. S. Environmental Protection Agency (EPA) have reviewed the subject document submitted by DOE and prime contractor, EG&G. The Division's comments, as well as those of EPA, are attached.

The work plan as presently written represents a significant improvement over the draft version. Several sections have been nearly completely rewritten and address OU-15 sites much more specifically. However, in several instances where DOE's response to the Division's comments state that the document was "modified as requested," no changes were made. In most cases, not making the specified changes will have little or no effect on the field sampling plan or on the preparation of a final report. In two cases, figures that were to have been modified have been resubmitted to the Division since the final version was submitted in October. In another instance, a comment on the draft version has been included once again in the attached comments.

The Final, Phase I RFI/RI Work Plan for OU-15 is conditionally approved pending completion of the items listed in the attached comments. Please submit any necessary corrections to the Department and EPA by January 15, 1993.

If you have any questions concerning these comments, please contact Carl Spreng of the Division at 692-3358 or Dave Maxwell of EPA at 293-1082.

Sincerely,

Gary W. Baughman
Chief, Facilities Section
Hazardous Waste Control Program
