ADMIN RECORD

**NOTICE OF COMPLETION
ROCKY FLATS CERCLA FIVE-YEAR REVIEW**

The U.S. Department of Energy Office of Legacy Management has completed a five-year review of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) remedy for the Central Operable Unit at the Rocky Flats Site. The purpose of the review is to ensure that the CERCLA remedy remains protective of human health and the environment. The five-year review report concludes that the remedy for the Rocky Flats Site Central OU is protective of human health and the environment. The next CERCLA five-year review will be conducted in 2012.

DOE submitted the report to the U.S. Environmental Protection Agency Region 8 on July 23, 2007, for review, and EPA concurred with the report on September 14, 2007. The final report, dated September 2007, is available on the Rocky Flats Site website at http://www.lm.doe.gov/land/sites/co/rocky_flats/regulatory.htm, or by contacting Rocky Flats Public Affairs at the address below.

The Rocky Flats Site, located approximately 16 miles northwest of Denver, was a key production plant in the nation's nuclear weapons program from 1953 to 1994. Production activities resulted in chemical and radiological contamination of surface water, groundwater, soil, and air. The plant's mission changed to cleanup and closure in the early 1990s, and the cleanup was officially completed when DOE, EPA, and the state of Colorado signed the CERCLA Record of Decision on September 29, 2006.

Additional Rocky Flats CERCLA documents such as the Corrective Action Decision/Record of Decision and Remedial Investigation/Feasibility Study/Comprehensive Risk Assessment are available on the Rocky Flats Site website at http://www.lm.doe.gov/land/sites/co/rocky_flats/regulatory.htm.

Information on the CERCLA five-year review process is available on the EPA website at <http://www.epa.gov/superfund/cleanup/postconstruction/5yr.htm>.
