RE: Final Interim Measure/Interim Remedial Action for Groundwater at the Rocky Flats Environmental Technology Site (June 21, 2005)

Dear Mr. Rampe:

The Colorado Department of Public Health and Environment and the Environmental Protection Agency approve the Final Interim Measure/Interim Remedial Action for Groundwater. This document is the result of a lengthy consultative process that integrates evaluation of the ground water to the overall Site cleanup. It also provides the basis for a long-term monitoring plan where unforeseen ground water contaminant impacts can be addressed. We believe that enhancements to address groundwater quality down gradient of the installed treatment systems, and the enhanced biodegradation of several VOC plume source areas will minimize ground water impacts to surface water.

We appreciate the time and effort of the DOE and contractor staff to complete this document with a systematic assessment of the huge volume of information.

Please contact Larry Kimmel (EPA) or Carl Spreng (CDPHE) with any questions you may have.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
