Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/19/08
 Observer(s) JKW
 Location ID Billb Wetland - A

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

See below

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

Area is very dry this year due to drought conditions
Some SAEXI patches are increasing annually in size & extent.

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
SAEXI	too many to count	2'	7'	8'	2'	6'	12'
TARA1	1	1'			2"		

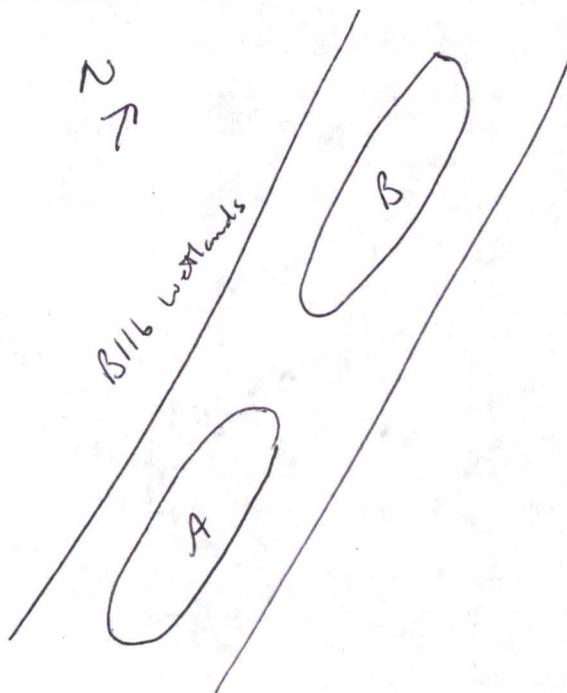

broken off

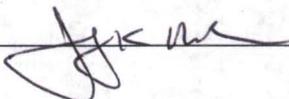

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

Suggestions for management:

Watch for weeds - spray as needed - hill slopes were sprayed
w/ Mileston - 2008 - so looking very good in area.

Form # _____

Date 8/19/08

Observer(s) JKW

Location ID B116 wetland - B

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

see below

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

Area dry now + because of drought this year.
SAEXI has established + is slowly filling in - not as well as
location A however.

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
SAEXI	too many to count	3'	5'	5	2'	6'	4'

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

Suggestions for management:

Watch for weeds + control as needed. Hillside sprayed w/
Milestone - 2008.

Other comments:

Area needs more water to really develop as a nice wetland
area.

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/19/08
 Observer(s) JKN
 Location ID B131 Wetland

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

Earlier in summer during very dry conditions some of hydrophytic plants were drying up. But wet conditions now are reviving them.

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes - in normal rainfall year. Been dry this year

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
PODE1	PODE1 1	8"			2"		
	8/19/08						

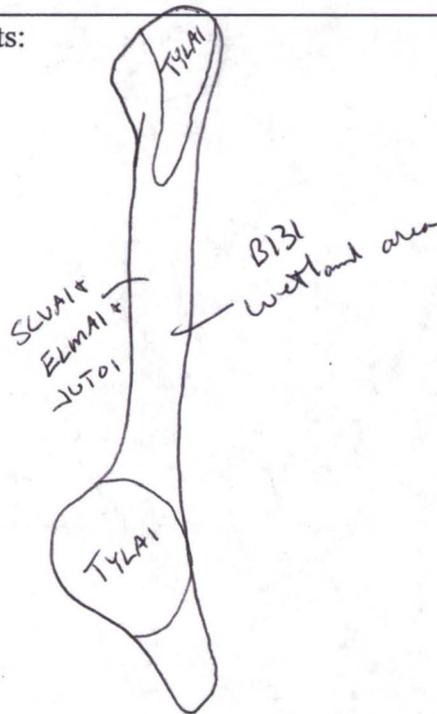

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June – August).

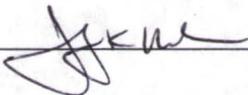

Suggestions for management:

Watch for weeds - control if needed.

Otherwise as water is available the wetland plants are spreading - slowly.

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/27/08
 Observer(s) JKN
 Location ID Bl Pond - A

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

no - TYLAI established across bottom.

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
POOE1	Too numerous	8"	6"	4"	2"	2"	2"
SAEX1	"	4'	5'	3'	2'	3'	1'
PRAM1	2	8"	10"		2'	3"	

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

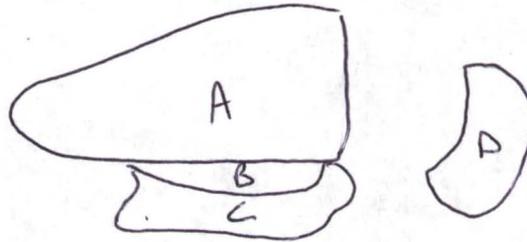

2

Suggestions for management:

Watch for weeds - control as needed.

Other comments:

ADD TYLAI.

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/22/08

Observer(s) JKN

Location ID FCI Wetland D

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

no

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes - doing well

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
PRVII (planted)	7 (surviving)	2.5	1'	1'	8"	6"	6"
PODE1	too numerous to count	8"	6"	3"	3"	1"	1"
PRAMI (west side planted)	7 (surviving)	2'	2'	1'	3"	3"	10"

outside wetland

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

Suggestions for management:

Watch for weeds - control as needed.

Other comments:

Area looking good. Most of PRV11 + PRAm1 planted last
Spring around perimeter of wetland doing well.

Date 8/19/08

Observer(s) JKW

Location ID FCL Road Crossing

Photographs taken today? Y N Taken earlier

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

No

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes - SAEXI + AmFRI are filling in drainage bottom very nicely.

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
SAEXI	} too many to count	3'	5'	5'	3'	7'	6'
AmFRI		1'	1.5'	1.5'	6"	1.5'	1'

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

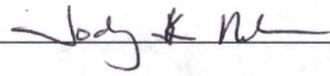

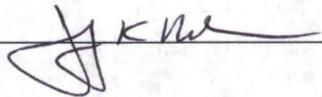

Suggestions for management:

Watch for weeds - control as needed.

Other comments:

Two thirds of area was turned back into a road crossing in 2008. A culvert was placed back in the channel & the road was re-established on top of it.

Portion left undisturbed is doing very well however.

Completed by:   Date 8/19/08

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/25/08

Observer(s) JKW

Location ID FC2 Wetland - B

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

no

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
SAEXI	too numerous to count	7'	8'	5'	5'	10'	4'
SAAMI	too numerous to count	7'	6'	7'	10'	4'	6'

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June – August).

Suggestions for management:

Control PHARI,

Watch for weeds - control as needed.

Other comments:

SAEXI + SAAMI expanding nicely.

 Observer(s) JKN
 Location ID FC2 Wetland - C

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

no veg growing here - area is under water ~6" or so
seems to be either under water or dry

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

maybe in time - area seems to be either totally unindented
or dry

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
8/25/08							

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

Suggestions for management:

Watch for weed - control if needed.

Perhaps create lower outlet to let water drain out of area.

Other comments:

Completed by: Jay K. Nelson JKN Date 8/25/08

Wetland Noxious Weed Survey Form

Observer Jody Nelson Date 6/11/08
Location FC2 wetland

Noxious Weed Species Present:

CIARI - 1% - scattered
CEDII - <1%
ELANI - <1% - west side of wetland edge

Comments/Notes:

Problem w/ CIARI is it is very close to water +/r to
SAEXI. Perhaps spraying individual plants would work.
Between water + pond edge + along N. edge between FC2 + FC2/FC3
SAEXI + SAAMI spreading very well.

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/25/08

Observer(s) JKN

Location ID FC2 / FC3 Confluence - B

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

no

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
<u>none here</u>							

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June – August).

Suggestions for management:

Watch for aquatic weeds - control as needed.

Other comments:

Lot of TYLAI

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/21/08

Observer(s) JKN

Location ID FC 4 Hillside Wetland - A

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

no

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes - wetland species are establishing very well.

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
<u>none here</u>							

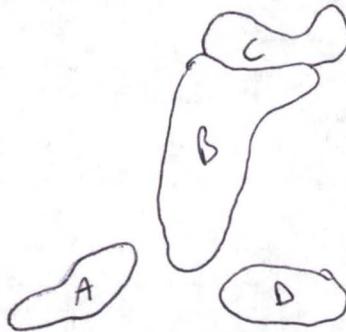

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

Suggestions for management:

Watch for weeds - spray as needed.

Other comments:

Area is expanding up the hill from last year. Looking very good. Lots of hydrophytes.

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/19/08

Observer(s) Jen

Location ID Melvin's Way Wetland

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

yes - area almost too dry to establish a good wetland

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

Rarely - if at all. Only gets water from rain + snow melt
An isolated pool.

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
<u>None here</u>							

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

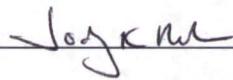

Suggestions for management:

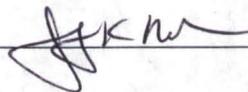

Watch for weeds - control as needed. Most of area
sprayed last spring when very dry.

Other comments:

Need more water for a good wetland to establish here.

Completed by:

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

See below

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

more or less - area is saturated today - has been dry most of year due to drought. Looks smaller than last year.

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
<u>None here</u>							

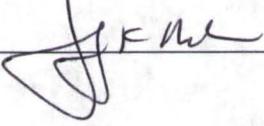

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

Suggestions for management:

Watch for weeds - control as needed.

Other comments:

Not very big for a wetland area - but may develop more in time w/ normal precipitation years.

Completed by: Jody Knels -  Date 8/19/08

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

no

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

yes - SAEXI is solid canopy - just like along rest of stream

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
SAEXI	too numerous	10'	10'	8'	5'	6'	4'
POAEI	3	5'	5'	10'	6'	5'	5'
SAAMI	3	7'	7'	4'	6'	6'	3'
PRVII	2	1'	1'		10"	10"	

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

Suggestions for management:

Watch for weeds - control as needed.

Other comments:

Looking very good - SAEI has grown well & taken over area.

WETLAND DETERMINATION

Hydrophytic Vegetation Present?	Yes	No	(Circle)	
Wetland Hydrology Present?	Yes	No	(Circle)	
Hydric Soils Present?	Yes	No	(Circle)	
				Is this Sampling Point Within a Wetland? Yes No
Remarks:				

Approved by HQUSACE 3/92

Wetland Qualitative Revegetation Evaluation Form

Form # _____

Date 8/26/08

Observer(s) JKW

Location ID SPAG - N data - B

Photographs taken today? Y N

Are desired wetland plant species present? Y N

Are there any issues regarding the establishment of the desired wetland species? Explain, if so.

yes - too dry now

Are the hydrologic conditions appropriate for successful establishment and sustainability of the wetland. If not, describe the problem/issue.

Barely - water from SPAG goes east now so area has dried up.

Woody Plant Counts

Species	Stem Count	Height			Width		
		1	2	3	1	2	3
SAEX1	2	4'	4'		3'	3'	

Noxious weed evaluation. See separate noxious weed evaluations conducted throughout the summer months (June - August).

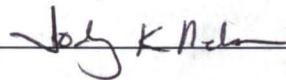

Suggestions for management:

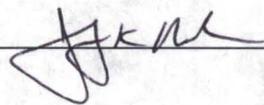

Watch for weeds - control as needed.

Other comments:

Area has dried up.

Wetland Noxious Weed Survey Form

Observer JKW Date 8/13/08
Location SP Discharge Gallery Wetland

Noxious Weed Species Present:

CIARI - 2%

Comments/Notes:

SAEXI dying along tire ruts - plenty of water.
Not sure why not surviving - too high of N?
