Ms. Vera Moritz  
RFLMA Project Coordinator  
U.S. Environmental Protection Agency, Region 8  
1595 Wynkoop St.  
Denver, CO 80202

Subject: Construction completion for new flume in Woman Creek and changes to RFLMA Points of Compliance (POCs)

Reference: Rocky Flats Legacy Management Agreement (RFLMA), Attachment 2, *Legacy Management Requirements*, Section 5.1, "Monitoring Surface Water"

Dear Carl and Vera:

This letter provides notification, pursuant to the referenced section of RFLMA Attachment 2, that construction of the new flume in Woman Creek for sampling location WOMPOC is complete.

The associated sampling equipment for this flume is installed and has been tested for proper operation. Based on this notification, WOMPOC now replaces POCs GS31 as the RFLMA POC for the Walnut Creek drainage at the Central Operable Unit boundary. Sampling location GS01 will continue to operate as the Woman Creek POC near Indiana Street.

As you are aware, non-RFLMA sampling and evaluation of results at GS31 is scheduled to continue in accordance with the June 2011 *Surface Water Configuration Adaptive Management Plan for the Rocky Flats, Colorado, Site (LMS/RFS/S07698)*.

A copy of this notification letter will be posted to the Rocky Flats website, and an email notification of the posting will be sent to our stakeholder list to provide information to the public regarding the change of the POCs.

Mr. Carl Spreng  
Ms. Vera Moritz
