Subject: Delivery of *2012 Wetland Mitigation Monitoring Report for the Rocky Flats Site*

Dear Ms. Moritz:

At the Rocky Flats Site cleanup and closure activities along with post-closure projects have disturbed several wetland areas. The *Site Wetland Mitigation Monitoring and Management Plan* (WMMMP: June 2006) was written to address the mitigation and monitoring of these effects on the wetlands. One of the requirements of the WMMMP is to produce an annual report that summarizes the monitoring data and management actions and issues from the previous field season. The report is due by March 1 of the year following when the data was collected. Enclosed are two copies of the *2012 Wetland Mitigation Monitoring Report for the Rocky Flats Site*. The report summarizes the wetland monitoring data that was collected during 2012, in addition to final wetland delineations for several locations that were delineated at the Site in 2012.

Because of the large number of monitoring photographs that the report includes, it is in a completely electronic format. The report is set up as a website on the enclosed DVD. To access the report, put the DVD in a DVD drive and open Windows Explorer. Double-click on the file called "START HERE 2012 Wetland Mitigation Report DVD.htm". Click the various sections of each report to access them. If desired, different sections can be printed. A read-me file on the DVD is also included which provides additional information about the report.

If you have any questions, or if you need additional copies of the DVD, please contact me. I may be reached at (720) 377-9682 or at Scott.Surovchak@lm.doe.gov. Please send any correspondence to:
