RE: RFLMA Contact Record 2014-05 approval

Dear Mr. Surovchak:

The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2014-05. This contact record describes a reportable condition that exists at the WALPOC monitoring location as a result of a 30-day average concentration for uranium of 16.9 µg/L. It also describes the actions taken to inform the public and the regulatory agencies of this condition.

The Department agrees with the conclusions of this contact record, which are consistent with consultation with the Department and EPA, which occurred on February 18, 2014. Issuing this contact record and taking the other actions it prescribes are requirements of Section 6.0 in RFLMA Attachment 2. The Department therefore approves Contact Record 2014-05.

Transmitting the results of the ongoing evaluation of uranium fate and transport in the Walnut Creek drainage will close out this contact record. The conclusions of that evaluation, however, may lead to additional actions. Please let me know if you have any questions regarding this approval.

Sincerely,

Carl Spreng
RFLMA Project Coordinator

cc: David Ward, Stoller
Vera Moritz, EPA
Walter Avramenko, CDPHE
Dan Miller, AGO

Filing: RFA 1.4.5

Carl,

Attached is the corrected CR 2014-05 for your files. The following editorial corrections were made: "Figure 6, 'Points of Evaluation'" was edited to read "Figure 5, 'Points of Compliance'" and all references to Figure 6 were changed to Figure 5; The Approval date was also corrected, from March 8 to April 8.

This Contact Record will be submitted for posting on the Rocky Flats website on May 5, 2014 unless directed otherwise by the Parties.
