RE: RFLMA Contact Record 2014-06 approval

Dear Mr. Surovchak:

The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2014-06. This contact record describes exceedances of the vinyl chloride standard that occurred at the Present Landfill Treatment System effluent monitoring location and the subsequent increased-frequency sampling taken as a result.

The Department agrees with the conclusions of this contact record, which are consistent with consultation with the Department and EPA, which occurred on April 24, 2014. Sampling at location NNG01 followed the procedures outlined in RFLMA Attachment 2, Figure 11 and did not produce results above the method detection limit. The Department therefore approves Contact Record 2014-06 and routine quarterly sampling protocols can resume at PLFSYSEFF.

Please let me know if you have any questions regarding this approval.

Sincerely,

Carl Spreng
RFLMA Project Coordinator
