Lakewood, CO 80228-1807

Subject: U. S. Fish and Wildlife Service (USFWS) Rocky Flats Site Annual Mitigation
Monitoring Report

Dear Ms. Linner:

Enclosed is the annual Preble's Mouse Mitigation Monitoring Report for the Biological Opinions for the Rocky Flats Site (2014 Annual Report, Biological Opinions: ES/LK-6-CO-04-F-012 [April 5, 2004], ES/LK-6-CO-13-F-008 [December 3, 2012], and TAILS: 06E24000-2014-F-0416 [March 17, 2014]) that is due to USFWS by December 1, 2014. The report contains summaries and photographs of monitoring that the U.S. Department of Energy (DOE) was required to conduct in 2014 for different projects under the Biological Opinion that DOE received from USFWS. The report is contained on the enclosed DVD. Two copies of the DVD are being provided at this time.

The report is completely electronic (as they have been in the past) because of the large number of monitoring photographs that are included. The report is set up as a website on the DVD. To access the report, put the DVD into the DVD drive on the computer and open up Windows Explorer. Click on the file called "START HERE 2014 USFWS BO Report.htm." Then just click the various sections of the report, as if you were navigating the Internet, to access them. If desired, different sections can be printed.

Two locations, GIS#OO (A-3 dam breach) and GIS#SS (old Present Landfill road), have met success criteria, and the vegetation is established and should continue to fill in and be self-sustaining. DOE requests USFWS concurrence that no further monitoring or reporting is required for these two locations. The monitoring results for each of these locations is provided in the report.

Ms. Susan C. Linner
