Dear Messrs. Nelson and Zane,

The Colorado Department of Health, Hazardous Materials and Waste Management Division (the Division), has reviewed the Draft Final version of the Community Relations Plan, dated January, 1991. The Division is very pleased with this new version of the CRP and commends DOE and EG&G for the effort involved in its preparation.

The Division suggests the following items for consideration prior to releasing the document to the public. First, the CRP should reflect the fact that the IAG has now been signed. This would improve the readability of certain sections of the document that refer to the IAG signing as an event still in the future. Second, there is a map showing land use in the Rocky Flats Plant vicinity that was presented to the Division in the final version (January 11, 1991) of the Surface Water IM/IRA that would fit very nicely into this document. This map could be included in either the "Site Description" or "Community Profile" sections of the CRP. Last, the final five paragraphs presented on page 13 of the CRP might fit better in the "Site Description" section of the CRP as they are addressing more of the physical environment of the plant-site rather than the surrounding community.

These items have already been discussed by phone with Jill Paukert of the Community Relations Division of EG&G and this letter is only a follow-up to the telephone conversations. If you have any questions regarding these matters, please call Joe Schieffelin of

ADMIN RECORD
