## TRANSMITTAL OF THE ENVIRONMENTAL RESTORATION HEALTH AND SAFETY PROGRAM PLAN AND WORKBOOK

Enclosed for delivery to the Environmental Protection Agency (EPA) are Environmental Restoration's Health and Safety Program Plan (ER HSPP) and Workbook. Delivery of this document to DOE is to meet the IAG deliverable date of November 12, 1990. The document incorporates review comments from the Environmental Protection Agency (EPA). EG&G Rocky Flats Health and Safety Department, Environmental Restoration Department, and the DOE comments were incorporated previously into the final draft versions of these documents.

The ER Health and Safety Program Plan establishes the health and safety requirements for all EG&G, DOE, and subcontractor workers, and visitors associated with ER program activities who work at designated Solid Waste Management Units (SWMUs) or identified contaminated areas at the Rocky Flats Plant. The program plan and workbook were developed in accordance with OSHA 1910.120, DOE Order 5480, the IAG, and applicable Rocky Flats Plant Policies.

Questions concerning this document or its transmittal should be addressed to Meredith Brogden of the ER staff at X5974.

  
J.M. Korsh, Associate General Manager  
Environmental Restoration and Waste Management

## **EXECUTIVE SUMMARY**

**This document is the Health and Safety Program Plan (HSPP) for Environmental Restoration Department (ER) program activities at the Rocky Flats Plant (RFP). EG&G, in conjunction with the Department of Energy (DOE), has voluntarily adopted the Federal Occupational Safety & Health Administration's (OSHA) standard for hazardous waste site workers (29 CFR 1910.120) at Rocky Flats which requires the preparation of this HSPP. Some sections of the OSHA standards are superseded by more stringent policies and procedures established by EG&G, the Department of Energy and/or other government agencies. The intent of this written program is to integrate the performance requirements of the OSHA standard, with existing Rocky Flats standards, in a manner which best serves the health and safety of workers, visitors and the surrounding population.**

**This Plan establishes requirements for all EG&G, DOE, and subcontractor workers and visitors associated with ER activities who enter designated solid waste management units (SWMUs) or identified contaminated areas at Rocky Flats Plant, and it establishes the framework for all site-specific health and safety plans that will be developed for ER Operable Units. Subjects addressed in this HSPP include health and safety responsibilities, hazard assessment, hazard communication, site control, personal protective equipment, material handling program, decontamination, medical surveillance, monitoring, training, and emergency response procedures.**

**This plan also describes the basic techniques for implementation of the health and safety program. Individuals responsible for developing site specific plans are encouraged to use this as a guide to Rocky Flats resources. These resources include in-house health and safety professionals, written health and safety procedures, emergency contacts and existing site characterizations.**
