

## INTEROFFICE CORRESPONDENCE

DATE: December 7, 1993

TO: R. M. Leithner, Resource Conservation Recovery Act Regulatory Programs,  
Bldg. T130C, X3537

FROM: *JJL* J. J. Listemann, Occupational Safety, Bldg. T452C, X7689

SUBJECT: STABILITY OF STERILIZED ISOPROPYL ETHER - JJL-017-93

When Emergency Technical Service Company stabilized the isopropyl ethers in question, an extra amount of stabilizing reagent was added in order to extend the stable period to one year. It is Occupational Safety's opinion that since this has occurred it is acceptable to move the material in question.

If you have any further questions concerning this matter, please contact me at Extension 7689 or Digital Page 3049.
