Argonne National Laboratory Review of Uncertainty Analysis and Risk Assessment for Rocky Flats Operable Unit 1

Sue Stiger, Associate General Manager  
Environmental Restoration Management  
EG&G Rocky Flats, Inc

Please find attached a copy of Argonne National Laboratory's Draft "Review of the Uncertainty Analysis and Risk Assessment for Rocky Flats Operable Unit 1" dated March 24, 1994. The uncertainty analysis and risk assessment was taken from the November, 1993 Phase III RFI/RI Report for Operable Unit (OU) No. 1, 881 Hillside. This review was requested by DOE/RFFO through the Los Alamos Technology Office (LATO) as an opportunity to improve risk assessments for OUs 2 through 15 at the Rocky Flats Plant, with an emphasis on the quantitative uncertainty analysis.

This document was transmitted to you and several of your staff members for informational purposes on March 28, 1994. We request that EG&G provide DOE/RFFO with concerns, if any, regarding Argonne's conclusions and recommendations. Based on your comments, along with a possible meeting with Argonne National Laboratory (ANL) and LATO staff members, DOE/RFFO would like to reach agreement with EG&G regarding improvements to risk assessments at the Rocky Flats Plant.

Since this document has been available to your staff members since March 28, 1994, we request that EG&G provide comments to DOE/RFFO by May 31, 1994. If necessary, a meeting will be held with ANL and LATO in early June, 1994.

Any questions or concerns should be directed to Bruce Thatcher of my staff at 966-3532.
