INPUT OF ECOLOGICAL DATA INTO RFEDS - JEE-0216-91

Ref: D. P. Simonson, ltr (5785) to J. M. Kersh, Surface Water Biological Monitoring,  
August 1, 1991

This letter responds to the referenced memorandum which addresses issues relating to the entry of ecological/biological data into the Rocky Flats Environmental Database (RFEDS). EMAD has been tasked with the collection of all samples related to environmental monitoring and restoration activities at RFP and incorporating those data into a centralized database. EMAD has created a module in RFEDS to handle ecological/biological data. This module has recently been completed and EMAD is working with the different groups to incorporate this information.

EMAD has personnel who are charged with overseeing the collection of biological information and interfacing with the other groups on field data collection. Meredith Brogden and Bruce Bevirt are the contact personnel. Annette Primrose and Stephen Singer are the contact personnel for incorporating biological parameter data into RFEDs. Mark Nielsen is the contact for the incorporation of map data.

EMAD is working with the RPD, NEPA and CWAD divisions on the input of all applicable information into RFEDS. The ecological assessment data currently being generated for the OU projects has been given top priority for input into RFEDS. Data from other ecological studies will be incorporated at a later date.
