Mr. Robert Nelson
Manager, U.S. Department of Energy
Rocky Flats Office
P.O. Box 928
Golden, Colorado 80402-0928

Dear Mr. Nelson:

Colorado State Forest Service (CSFS) has a long and successful history of conservation tree planting for the public and private sector in Colorado. Many windbreaks, living snow fences, wildlife habitats and new forest stands for timber have been established through our efforts.

We at CSFS are looking forward to developing a long-term partnership with EG & G Rocky Flats to promote, through tree and shrub planting, wildlife habitat enhancement for species indigenous to the plains and foothills of Colorado. Secondary benefits of these plantings will include wind protection and reduced topsoil loss, increased water yields, and other mitigation measures to offset prior environmental site damage.

If you or your staff have any questions or concerns regarding our conservation wildlife tree planting proposal for Rocky Flats, please feel free to contact me at (303) 491-6303, or our personnel at the Golden District office.

Sincerely,

William R. Wilcox
Assistant State Forester
