Denver, Colorado 80202-2405

Dear Mr Hestmark

The Rocky Flats Office (RFO) wishes to confirm recent discussions which have been held between your office and the Environmental Restoration staff of RFO regarding investigation and cleanup of certain locations which may be contaminated from old releases of polychlorinated biphenyls (PCBs). The discussions covered 26 locations which were reported as potential areas of concern on the Historical Release Report (HRR) as required under the Interagency Agreement (IAG). It was suggested in the discussions that 20 of the 26 locations should be investigated, and, if necessary, remediated under the Toxic Substance Control Act (TSCA) regulations. The 20 sites have been determined to be external to Individual Hazardous Substance Site boundaries, and therefore can be remediated outside of the IAG.

Accordingly, Rocky Flats intends to perform investigations and any necessary cleanup under the TSCA rules for the locations listed below in the HRR submitted by EG&G in 1992. We will coordinate such efforts with the Region VIII Toxic Substance Control Branch.
