ECOLOGICAL MONITORING PROGRAM RECLAMATION MONITORING REPORT —
GHS-524-93

Enclosed is a copy of the Reclamation Monitoring Report, to meet Milestone Activity 61405107-E. Reclamation monitoring is a new feature of the RFP Ecological Monitoring Program. This report is the first attempt to synthesize past, present, and future reclamation activities, and to provide a conceptual framework for program development. Reclamation activities will become increasingly important at the RFP in the coming years, as remediation activities are implemented. Ecology and National Policy Act Division (END) personnel are proactively working on the development of this program.

Three Appendices are referenced in the text of the report. Appendices 1 and 2 are complete and Appendix 3 is pending a Quality Assurance/Quality Control review. This appendix, which contains the raw data from a Weed Control Monitoring project conducted by END personnel, will be transmitted upon completion.

Should you have any comments or questions, please contact Steve Nesta at X8605 or Fred Harrington at X4939.

George H. Setlock
