RE: Additional Comments to the I.A.G.

Dear Nat,

Please include these written comments as an addendum to my oral testimony given on February 13th, and change my reference to EG&G as a party. <sup>to that</sup> <sub>1 of</sub> <sup>DUE</sup>

\* \* \*

.... In order that the public may better percieve that there is credible oversight during remediation of Superfund sites at Rocky Flats; we highly recommend that said partys publish monthly a Site Progress Report which would include but not be limited to the following information & data:

- a) Brief description summary of work performed & by whom
- b) Dates site was inspected by CDH & EPA and by whom
- c) Equipment log (type used, hrs. used, rad inspections, detox, owner)
- d) Worker log (# used, hrs. at site, individual radiation badge counts, daily radiation count on worker clothing at end of shift)
- e) Site specific Wind Rose data (direction, speed, frequency, shutdowns)
- f) Site specific Soil Sampeling (when, how, where within site, % of respirable dust, characterization, etc)
- g) Site specific Air Monitoring (when, type of, locations, data, etc.)
- h) Weekly inspection reports on worker compliance to OSHA Regulations
- i) Removal of Soil (characterization, cu.yds., deposited where, when, how)
- j) Water Seepage (characterization, amount pumped, when, where to)
- k) Minimum of two pictures of current construction & a site layout

The Site Progress Report should be compiled & copies given to the individual members of the Rocky Flats Cleanup Commission within 20 days

Respectfully,

*Kim R. Grice*  
Kim R. Grice, Chairman
