TRANSMITTAL OF DRAFT "MICROBIOLOGICAL EVALUATION OF STP OPERATION AT THE ROCKY FLATS PLANT" (Progress Report No. 1)

Please find attached a copy of the Progress Report No. 1 referenced above regarding evaluation of the RFP Sewage Treatment Plant (STP) by Dr. Michael Richard, our consultant from Colorado State University.

There are several deficiencies observed regarding operation of the STP summarized on Page 2 "Recommendations". The observations are valuable in providing Rockwell information beneficial to improvement of operations. However, please understand that implementation of changes to operation that involve budgetary adjustments and/or manpower increases will take time to implement. We have been in close communications with the Utilities Department on the needs to make the improvements and their concerns about impacts on resources.

The Rockwell legal department has advised us to issue the report to DOE under this qualifying cover letter.

If you have any questions please call G. H. Setlock, Environment and Health Programs, X2453.

Unsigned Draft

R. J. Erfurdt, Director
Health, Safety and Environment
