Groundwater Recharge Study and Seepage Characterization Work Plan

Marla Broussard, Manager
Environmental Restoration Operations
EG&G Rocky Flats, Inc.

The U.S. Department of Energy, Rocky Flats Field Office recently reviewed the Groundwater Recharge Study and Seepage Characterization Work Plan and has determined that several deficiencies exist in the document. The proposed scope of work is not clearly identified and objectives are not well defined.

Prior to the start of field activities, the objectives of each specific task should be clearly identified and presented. The appropriate rationale should be stated for each task. With regard to well point installations and flow measurement sites, a clear rationale should be stated why each location was chosen.

In addition, please contact the Ecology and Watershed Management Division to discuss any potential impacts to Prebles Meadow Jumping Mouse habitat that may be associated with this program.

Please contact me at extension 4226 if you should have any questions regarding this correspondence.
