Dear Mr. Guillaume:

I am writing on behalf of Perry McKay with regard to the proposed agreement which you provided to him. I appreciate your consideration of my comments in my letter of August 4, 1992, as well as your meeting with Mr. McKay and Mr. Nickerson to discuss your proposed monitoring program.

Enclosed is a copy of the General Use Agreement which includes my comments. These would apply to both Jefcope II and Mr. McKay. I have also included a proposed revised paragraph 4. In addition, in the McKay agreement, please add a "Whereas" clause which provides generally that DOE and EG&G, as a successor to Rockwell, have entered into certain stipulations as a result of previous litigation and that DOE, as part of the stipulations, has committed that no contamination exists on the McKay property, and that these tests are merely to provide further verification of that fact.

Please call me directly if you would like to discuss this matter in more detail.

Very truly yours,

SAUNDERS, SNYDER, ROSS

EXHIBIT B**OU 3 RFI/RI SAMPLING ACTIVITY DESCRIPTIONS -JEFCOPE II**

The planned OU 3 sampling activities are detailed in the RFI/RI Work Plan. The Work Plan outlines the purpose, objectives, rationale and methods used to evaluate the presence or absence of contamination within OU 3. The Work Plan is based on the requirements of the Interagency Agreement (IAG) between the Department of Energy (DOE), the Environmental Protection Agency (EPA) and the State of Colorado Department of Health (CDH).

OU 3 sampling activities began in April, 1992 and are scheduled for completion by spring of 1993. A Final RFI/RI Report which details the results and conclusions from this study is scheduled for completion in January, 1994. The Access Agreement period is extended for three years to cover any follow up activities that may be required during development of the Final RFI/RI Report.

The map, attached to this correspondence, shows the location of the sampling activity. The sample location will be surveyed prior to, or during the sampling event. Field adjustments could be made at the time of sampling to adjust specific sampling locations.

Sampling activities will not adversely effect environmental resources. OU 3 sampling activities on Jefcope II property involve collection of soil data. The collection of surface soil samples involves removing one quarter to one half inch of surface soil from a 3 X 3 inch square in 25 locations within a ten acre plot. The ten acre plot locations are shown on the Exhibit A map.
