Draft Sampling and Analysis Plan for the Proposed Action Memorandum  
for the Remediation of Polychlorinated Biphenyls.

Slaten,

Colorado Department of Public Health and Environment, Hazardous Materials and  
Management Division (the Division) has reviewed the final Draft Sampling and  
Plan (SAP) for the Removal of Polychlorinated Biphenyls. The Division  
the SAP plan under the condition that the following comments be adequately  
prior to implementation of work:

on 2.1: Samples taken during excavation exceeding 10 ppm PCBs by weight,  
require additional soil to be removed, not 25 ppm. This will be consistent  
ion 1.2, paragraph 2.

on 5.3.2.3(I.): In the field, levels of 10 ppm PCBs by weight should be  
vide the excavation activities and should be changed in all the pertinent  
s in this section. This will be consistent with section 1.2, paragraph 2.

Contact Melani Arai at 692-3415 or myself if you have any questions.

**RE: Final Draft Sampling and Analysis Plan for the Proposed Action Memorandum (PAM) for the Remediation of Polychlorinated Biphenyls.**

Dear Mr. Slaten,

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division (the Division) has reviewed the final Draft Sampling and Analysis Plan (SAP) for the Removal of Polychlorinated Biphenyls. The Division approves the SAP plan under the condition that the following comments be adequately addressed prior to implementation of work:

1. Section 2.1: Samples taken during excavation exceeding 10 ppm PCBs by weight, should require additional soil to be removed, not 25 ppm. This will be consistent with section 1.2, paragraph 2.
2. Section 5.3.2.3(I.): In the field, levels of 10 ppm PCBs by weight should be used to guide the excavation activities and should be changed in all the pertinent categories in this section. This will be consistent with section 1.2, paragraph 2.

Please contact Melani Arai at 692-3415 or myself if you have any questions.

Sincerely,

Joe Schieffelin, Unit Leader  
Rocky Flats Unit  
Hazardous Waste Control Program
