**Regulatory Contact
Phone** Roland Hea and Chip Hancock
303-692-3252

Agency: Colorado Department of Public Health and Environment (CDPHE)

Purpose of Contact: Proposal and discussion of future Site Air Pollutant Emission Notice (APEN) submittal strategies

Discussion

Mike Putney, Rob Garren, and Patrick Haines (URS RFETS Air Programs) and Bob Ninninger (K-H ESS) met with Roland Hea, manager of the Construction Permits Unit of the CDPHE, Air Pollution Control Division, CDPHE permitting engineer Chip Hancock, and Site CDPHE inspector Arch Crouse to propose a strategy for future Site APEN submittals. Site Air Programs proposed that the Site submit a comprehensive fugitive dust emissions APEN for all future environmental restoration (ER) activities based on the current schedule, and on the current emissions information. The Site-wide APEN would include a list of potential dust control measures to be utilized during soil disturbance activities. Mr. Hea and Mr. Hancock agreed with the concept, but said that CDPHE would require a construction permit and APEN for the non-CERCLA projects (Industrial Area reconfiguration, Ponds reconfiguration, and road removal). They suggested two options, the first would be to voluntarily obtain a construction permit for all remaining ER activities, including CERCLA activities. The second option is to obtain a construction permit for non-CERCLA activities, and submit a separate single APEN for all other ER CERCLA activities. The second option is the preferred option and the one that Site Air Programs will pursue.

Patrick Haines provided an informal verbal notification to Arch Crouse that decommissioning of Building 371/374 and Building 559 had clearly advanced into the "active" phase of decommissioning, and effluent environmental air sampling would be discontinued in Building 559 on June 15, and in Buildings 371/374 on July 6, with formal written notification to follow.
