Dear Gentlemen:

Enclosed is one copy of the Draft Final Interim Measure/Interim Remedial Action (IM/IRA) for Groundwater at the Rocky Flats Environmental Technology Site, dated May 3, 2005. This draft reflects changes made to incorporate comments received during the public comment period. Because of the major changes to this document, it is being provided in advance of finalizing some issues through the consultative process, including:

- The use of phytoremediation as a remedy or as an enhancement; and
- The use of *in-situ* enhanced biodegradation in certain areas.

In addition, gross beta and total radium (Ra-226 + Ra-228) are included as Analytes of Interest (AOIs) in the May 3, 2005, final draft document. However, these analytes were subsequently identified as not meeting the AOI selection criteria; and therefore, will be eliminated from the AOI list in the final version of the document. Neither of these analytes formed the basis for conducting an accelerated action when they were included in the document.

We look forward to receiving your comments on the Groundwater IM/IRA as we work toward finalizing the document.

If you have any questions, please contact Norma I. Castaneda, of my staff, at (303) 966-4226 or you may contact me at (303) 966-2282.
