Upper Galilee
12210, Israel

Dear Dr. Litaor:

The Department Of Energy (DOE) is in receipt of a request from LeRoy Moore of the Rocky Mountain Peace and Justice Center dated January 4, 1999, concerning additional information that you might need from DOE to complete your study of hydrogeochemistry of plutonium in soils here at the Rocky Flats Environmental Technology Site (Site). DOE has provided to you information you have requested previously, and believes this fulfills our commitment to provide you with the information you need to continue your research.

The AUTOCAD software you are requesting is public domain software and should be available through your university. For us to provide it to you directly would cost the Department of Energy approximately \$2,000. These funds would have to be diverted from the cleanup of the Site and as such we are declining to provide this software to you. I am the DOE lead for the Actinide Migration Studies and if you need any of the public information generated by this group, please feel free to call me at (303) 966-9692.

Sincerely,

Russell McCallister
