Mr. Vijendra Kothari  
DOE/LM20  
99 Research Park Rd.  
Morgantown, WV 26505

Dear Mr. Kothari,

This is in response to the request for information on any wells of record drilled within what is delineated as Special Area 4 (Weldon Springs) since January of 2004. As you are aware, the area within St. Charles County, Missouri, west of the city of Weldon Springs has been listed as a special drilling area under the Missouri Well Construction Rules (MWCR). This listing became effective on August 30, 2007. A full delineation of the area is listed within the MWCR (figure 7D), a copy of which is attached.

A search of our records indicates there are no wells of record (other than monitoring wells associated with the site) drilled within this area since January of 2004. There is a reconstruction record for one of wells for PWSD # 2. This reconstruction of an existing well was completed in December of 2006. The location of this well is on or near the boundary for what became Special Area 4. The location provided for the well was latitude: 38 degrees, 39 minutes, 6.4 seconds North, longitude: -90 degrees, 44 minutes, 58.81 seconds West. The reference number for this well is 304188. The well appears to be part of the established well field in the Weldon Spring State Wildlife Area (please see attached maps). If I can be of any further assistance, please feel free to contact me via any of the methods listed below.

Sincerely,

  
Matthew Parker, RG
