Mr. Frank Iannizzara
Engineering Department
Copperweld Steel Company
4000 Mahoning Street
Warren, Ohio 44482

Dear Mr. Iannizzara:

At the request of the U.S. Department of Energy (DOE) and with your company's consent, Oak Ridge National Laboratory (ORNL) performed a radiological survey of the Copperweld Steel Company facility in Warren, Ohio. I am enclosing a copy of the ORNL report, entitled Preliminary Site Survey Report of the Copperweld Steel Company, 4000 Mahoning Avenue, NW, Warren, Ohio (CW0001). This report has also been furnished to the United Steelworkers of America (Local 2243), the U.S. Environmental Protection Agency (EPA), and the State of Ohio for their use.

The survey found that the radiation levels and measured radioactivity are not significantly different from normal background levels in Ohio. Since no radioactivity relating to DOE's predecessor was found during the survey, DOE will eliminate your company's facility from further consideration in its Formerly Utilized Sites Remedial Action Program (FUSRAP).

We appreciate very much the assistance your company provided in permitting the survey, and I am pleased to notify you that no residual radioactivity was found. If you have any questions or if I can provide further assistance, please call me at 301-353-8149.

Sincerely,

W. Alexander Williams, PhD
Designation and Certification Manager
