

JAN 7 1986

Mr. Ken Blower, Manager
Corporate Environmental Affairs
Standard Oil Company of Ohio
Midland Building
Cleveland, Ohio 44115

Dear Mr. Blower:

The Department of Energy (DOE), as part of its Formerly Utilized Sites Remedial Action Program (FUSRAP), has reviewed information on the former DuPont Grasselli Research Laboratory (now Standard Oil Company of Ohio) to determine whether it contains residual radioactivity traceable to activities conducted on behalf of the Manhattan Engineer District and the Atomic Energy Commission (predecessors to DOE). A radiological survey of the area utilized for Manhattan Engineer District activities indicated that the radiation levels are equal to natural background. Therefore, no remedial action is required, and DOE is eliminating the site from further consideration under FUSRAP.

The information supporting this decision will be archived by DOE, and a copy of the elimination report will be available for public review between 8:00 a.m. and 4:00 p.m., Monday through Friday (except Federal holidays), at the DOE Public Document Room located in Room 1E-190 of the Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C.

If you have any questions regarding this decision, please call me on 301-353-4716.
