Docket No. 40-0772

22 OCT 1981

Bondix Corporation
Guidance Systems Division
ATTN: Mr. William Hooper
Manager, Plant Engineering
Teterboro, New Jersey 07608

Gentlemen:

Subject: Inspection 81-15

This refers to the closeout safety inspection conducted by Ms. M. Campbell of this office on August 27, 1981, of activities formerly authorized by NRC License No. STB-424 and to the discussions of our findings held by Ms. Campbell with yourself at the conclusion of the inspection. This closeout inspection was conducted as part of an NRC effort to ensure that facilities where licensed activities were formerly conducted meet current NRC criteria for release for unrestricted use.

Areas examined during this inspection are described in the Office of Inspection and Enforcement Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Within the scope of this inspection, no items of noncompliance were observed. In addition, it appears your facility meets current criteria for release for unrestricted use.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC's Public Document Room. If this report contains any information that you (or your contractors) believe to be exempt from disclosure under 10 CFR 9.5(a)(4), it is necessary that you (a) notify this office by telephone within ten (10) days from the date of this letter of your intention to file a request for withholding; and (b) submit within 25 days from the date of this letter a written application to this office to withhold such information. Consistent with section 2.790(b)(1), any such application must be accompanied by an affidavit executed by the owner of the information which identifies the document or part sought to be withheld, and which contains a full statement of the reasons on the basis which it is claimed that the information should be withheld from public disclosure. This section further requires the statement to address with specificity the considerations listed in 10 CFR 2.790(b)(4). The information

sought to be withheld shall be incorporated as far as possible into a separate part of the affidavit. If we do not hear from you in this regard within the specified periods noted above, the report will be placed in the Public Document Room. The telephone notification of your intent to request withholding, or any request for an extension of the 10 day period which you believe necessary, should be made to the Supervisor, Files, Mail and Records, USNRC Region I, at (215) 337-5223.

No reply to this letter is required; however, should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

John D. Kinneman, Chief, Materials
Radiological Protection Section,
Technical Inspection Branch

Inspection Summary:

Inspection conducted on August 27, 1981 (Report No. 40-U/12/81-15)

Areas Inspected: Special, announced closeout inspection of formerly licensed thorium alloy processor, including interviews with personnel, and independent measurements of contamination and radiation levels. The inspection involved 3 inspector-hours onsite by one regionally-based NRC inspector.

Results: All thorium source material was used in production, prior to expiration of the license. No residual contamination or radiation levels above background were identified in the areas surveyed.
