Dr. Karl Schwartzwalder  
A. C. Spark Plug Division  
General Motors Corporation  
Flint, Michigan

Dear Dr. Schwartzwalder:

We are sending you 10 pounds of G.P. unfused thorium oxide (Lindsay Light Company product). Would you please prepare for us, if the amount sent you is sufficient, about 12 crucibles from the thorium. We would also like to have about 24 crucibles prepared from your 100% alumina. This latter request, you will recall, is contrary to our decision while at your plant. We feel, however, that the pure alumina crucibles should be given further study under the exact conditions of our experiment.

Would you please let me know when we might expect delivery of the crucibles? You can probably prepare those of alumina more rapidly and shipment of these at the earliest date would be very helpful to us.

Mr. Keith and I wish to thank you for so kindly giving us your time while we were at the plant.

Sincerely yours,

TECHNICAL DIVISION  
J. Chipman, Section Chief
