Subject: PRELIMINARY SITE VISIT - REVERE COPPER AND BRASS CORP.

Dear Mr. Williams:

This letter is in response to your request concerning the results of the preliminary site visit to the former Revere Copper and Brass Corporation site at 5851 West Jefferson Street in Detroit, Michigan.

The facility was visited on September 13, 1989 by myself accompanied by Mr. Andy Wallo, DOE. At that time, the facilities previously used by the Revere Copper and Brass Corporation had been demolished and the site in essence no longer existed. Surface gamma scans performed at that time did not identify any areas with direct radiation levels above those associated with natural background. In addition, preliminary survey results of another facility, with structures which were intact, in the Detroit area which did work similar to that performed at the Revere facility, did not identify any areas of residual contamination.

If you have any questions or comments regarding this information, please contact me at FTS 626-2908.

Sincerely,

Michele R. Landis,
Staff Health Physicist
Environmental Survey and
Site Assessment Program
