CONSENT FORM

2774

I/we agree to permit representatives of contractors of the U.S. Department of Energy (DOE) to enter upon my/our property to conduct a walkover survey of biological resources within a 1,000 foot distance from the Fernald Environmental Management Project (FEMP). This survey consists of two separately occurring components: 1) surveyors will enter the property to measure distance from the FEMP and place temporary markers; and 2) a small team (two to three persons) of field biologists will walk across the property to examine and describe the animal and plant communities. The field biologists will record general habitat types, dominant plant species and approximate species abundance, as well as animal species or signs of them. The first part of the survey will take place some time during the month of February 1992 and the biological assessment will begin in early March 1992.

The results of the survey will be included in a report describing potential impacts of FEMP remedial activities on biological resources. I/we agree to allow the use of the information gathered on my/our property in this report and understand that DOE will make available to me/us a copy of the resulting report upon request.
