Susan Osborne
Great Rivers Council, Girl Scouts of America

Dear Ms. Osborne:

To complete a biological resources survey of all property within 1,000 feet of the north and east boundaries of the Fernald Environmental Management Project (FEMP), we are requesting permission to access the southern portion of Camp Ross Trails. This survey will be conducted in two separately occurring components: 1) surveyors will enter the property to measure distance from the FEMP and place temporary markers; and 2) a small team (two to three persons) of field biologists will walk across the property to examine and describe animal and plant communities. The field biologists will record general habitat types, dominant plant species and approximate species abundance, as well as animal species or signs of them. The first part of the survey will take place some time during the month of February 1992 and the biological assessment will begin in early March 1992.

The information to be gathered is needed to assess potential impacts to the area resulting from proposed remedial activities at the FEMP.

Enclosed is a sample copy of a consent form which, when signed, allows members of the Department of Energy's contractor staff access to your property to conduct this survey. Carol Brown or Scott Glum of Advanced Sciences, Incorporated will phone you to arrange an appointment to discuss any questions you may have and to obtain access to your property by jointly signing a consent form. In the event that your telephone number is unlisted, please phone Carol Brown at 738-3100; if we do not hear from you, please expect a visit at your place of residence.

Thank you for your attention.

Sincerely,
Bob Tiller
R. E. Tiller
Manager
