Comment: The third and fourth bullets on this page and the first bullet on Page 2-3 discuss operations involving selected extraction and injection wells. The wells are referred to by their five digit identification numbers. The weekly conference call ARWWP update faxes, however, use a different numbering scheme in discussions of these wells (e.g., RW3, SPO7, IW9). The quarterly summaries should indicate each well's alternative number in parentheses to provide consistency with the faxed reports.
