DEMOLITION SURVEY REPORT FOR 776/777 COOLING TOWER
COMMISSIONING - MSF-050-01

and please find the Pre-Demolition Survey Report for 776 / 777 Project's pending
tower decommissioning Extensive sampling and analysis for radiological and
chemical contamination indicates that these towers are contaminant free, and may be
classified as Type I structures under the site's Decommissioning Program Plan

Staff appreciates the opportunity to work closely with both DOE and CDPHE in
revision of earlier drafts of this report The recent meeting with William Prymak of
DOE and our staff should have resolved all outstanding DOE concerns
