Agency: CDPHE

Purpose of Contact: Repack operations of LLM and/or TRM in the non-permitted SRV airlock of B776.

Discussion:

I contacted Mr. Hindman this afternoon to discuss drum repack operations of mixed waste in the non-permitted SRV airlock of B776. I explained to Mr. Hindman that the nature of this activity would involve removing non-conforming items from a particular drum, repacking the drum to specs and placing the removed item(s) in a different container. Drums in this operation will be returned to appropriate storage and will not be left unattended after the shift has ended. Additionally, if containers of liquid are removed then plastic sheeting will be placed on the floor so as to protect the area from spills/leaks. Lastly, this operation is expected to last until May 1, 2002.

Mr. Hindman agreed that this operation could take place following the controls listed here.
