**Purpose of Contact:** Notification of placement of RCRA regulated waste in a non-regulated storage area.

### Discussion

During a review of the WEMS system, it was determined that a hazardous waste container ( IP2) containing circuit boards had been moved to the 779 Pad. The container was moved to the Pad on Tuesday, April 11. The 779 Pad is not a RCRA regulated unit. Two additional IP2 containers of lead (D008) were taken out to the 779 PAD on Wednesday morning.

I attempted to contact Cynthia Burbach, CDPHE at approximately 4:00 p.m. on Wednesday and left a message. I followed up with another call around 8:35 a.m. on Thursday and reached Cynthia Burbach. I explained the facts regarding the 779 Pad. Ms. Burbach requested a contact record be submitted. In addition, I contacted Edd Kray, CDPHE on Thursday morning (6:45 a.m.) and discussed this issue with him.

The following Corrective Actions were undertaken:

- On Wednesday, an internal reportable was declared and the finding entered into ECATS
- The area was posted as a 90-day RCRA storage area;
- Unit information sheets were posted;
- Additional Hazardous waste labels were placed on these containers as tarps obscured the hazardous waste labels; and
- A Fact-Finding Meeting was held to determine the underlying cause of this incident.

The area where the IP2 containers were being stored on the 779 PAD was in full compliance with RCRA requirements by Wednesday, April 12 at 3:00 p.m.
